A Exploratory growth: T, 2T and 4T on physical time axes
T reference (dt)
2T reference (dt/2)
4T exploratory (dt/2)
Weighted top sigma (mol/mol)
Actual physical time (h)
Sigma / minimum
Fourier / minimum
Eigenmode projection / minimum
Amplification from minimum
Actual physical time (h)
Sigma / surface mean
Relative surface perturbation (dimensionless)
Actual physical time (h)
1e−5
Descriptive log-sigma slope (1/s)
Actual physical time (h)
