C M1 concentration fields: full domain and explicitly magnified top 5 mm
t = 0.00 h
t = 12.63 h
t = 37.90 h
z (m)
Depth below top (mm)
Horizontal position (m)
Total x (mol/mol)
x - horizontal row mean (10⁻⁶ mol/mol)
Native nodal fields; shared color limits within each row. Bottom row removes the row mean and magnifies small perturbations.
