a Seeded surface perturbation
WP5 endpoint
Weighted sigma (10^{-6} mol/mol)
Physical time (h)
b Amplification from observed minimum
sigma / minimum sigma
Physical time (h)
c Actual concentration; no extrapolation
M0 mean
M0 max
M1 mean
M1 max
Solubility limit
Salt mole fraction (mol/mol)
Physical time (h)
d Deviation from a single top harmonic
Energy fraction in top harmonics 2 + 3
Review trigger, not a physical boundary
Physical time (h)
